

Mobile Discovery.

HLR Lookup

txtNation provides tier-one, scalable and on demand **HLR Lookup** services with advanced Mobile Number Portability (MNP) checking.

MNP Factoids:

- **Mobile Number Portability** (MNP) has been released in over 50 countries and growing.
- More than 250 million mobile numbers have already ported.
- Over 2 billion users are able to port at any time.

Having accurate data is key for enabling and supporting precise and cost-effective communications and authentication processes with customers. **txtNation's Number Lookup and Discovery** service provides customisable network information from databases, from the GSM network and from other sources.

This service enables companies to perform efficient subscriber database cleaning, compile statistical data, implement anti-fraud procedures and ID verification, and many other use cases.

“ txtNation provides tier-one, scalable and on demand HLR Lookup services. ”

“ Our Gateway enables a true, global lookup based service for mobile discovery and mobile number portability. ”

Our Gateway enables a true, global Lookup based service for mobile discovery and mobile number portability. HLR can easily be combined with any Bulk SMS or Mobile Billing services.

Design with Quality

By design, our HLR Lookup services are not meant to tell you if a MSISDN is active or not. It's main purpose is to tell you whom the current service provider is for a specific MSISDN. The important thing to remember when performing a HLR request is that a MSISDN has various states within a country and also within an operator.

Within our Gateway, txtNation provide two main types of Mobile Number Discovery options:

i) **HLR Lookup (MNP: Mobile Number Portability Lookup)**

ii) **Real-time HLR Lookup** includes delivery of the 'full' IMSI number and MSC.

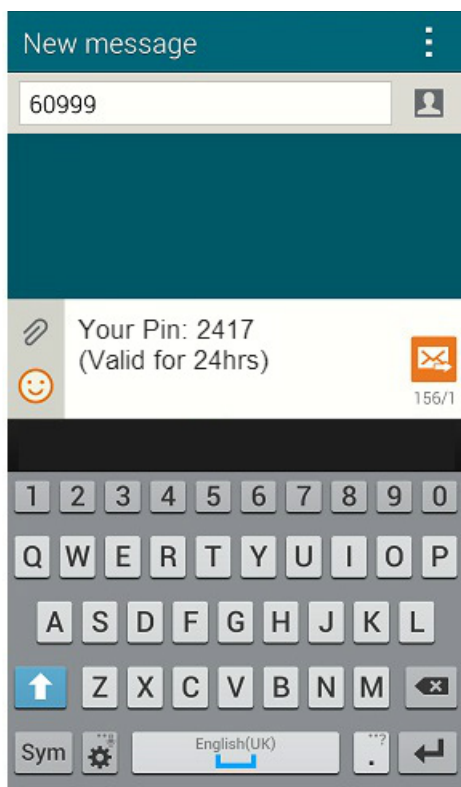

Scripts for HLR Connectivity

[Java](#)[PHP](#)[C#/.Net](#)[C++/CLI](#)[VB.NET](#)[ASP](#)[RUBY](#)[NodeJS](#)[Python](#)[C#](#)

```
1 import java.io.BufferedReader;
2 import java.io.IOException;
3 import java.io.InputStreamReader;
4 import java.io.UnsupportedEncodingException;
5 import java.net.URL;
6 import java.net.URLConnection;
7 import java.net.URLEncoder;
8
9 // Simple send SMS programm
10 public class SendSMS {
```

Combine HLR with OTP (One time Passwords)

Plugins and Apps

Benefits

Worldwide Lookup Coverage

Extensive reach to Number Portability data, with access to over 2 billion numbers.

Speed of integration

The txtNation Gateway enables service provider to integrate seamlessly and locate mobile numbers across the world.

Innovation and Testing

Dynamically query, locate and lookup a mobile number in real-time. Test, before live deployment.

Easy to use

txtNation's HLR Lookup greatly alleviates large system integration and development with one standard interface.

Cost Effective

Pay per 'Lookup' business model with no expiry on queries. No upfront investment.

Interoperability

Supports compatibility with any current or future suppliers and lowers barriers to service adoption.

Optimise message and call routing

With real-time lookups, companies can immediately and accurately identify the subscribers mobile network.

“ 99.99%
Query Availability ”

Performance/SLAs

- Query Availability: 99.99%
- Provisioning Availability: 99.9%
- Support: 24.7.365
